

## Mini Projects 2022

S.No	Project Title with AIM	Sensors Required	Sensor Image
1	<b>Home Security System with IoT interface</b> Detect presence of intruders and unauthorised opening of windows using PIR and magnetic switch sensors and alarm status update in Firebase and mobile app	Magnetic switch PIR sensor	 
2	<b>Smart Garden with IoT interface</b> Detect level of soil moisture and switch on motor based on limit checking, transfer soil moisture data and motor status to Firebase and display in mobile app	Soil Moisture sensor	 
3	<b>IR Remote based Control with IoT Interface</b> Local control of an appliance using IR remote as well as cloud based control using a mobile app	IR Receiver IR Generic Remote	 
4	<b>IoT based Remote Range Meter</b> Detect range at which object is present using Ultrasonic sensor HC0SR04 and transfer range data to Firebase and display in mobile app	Ultrasonic sensor	

5	<b>Fall Detection using IoT</b> Detect fall forward, backward, left or right using multi-axes accelerometer MPU6050 and transfer fall status to Firebase and display in mobile app	MPU6050 Multi-axes accelerometer	
6	<b>Gesture Recognition using IoT</b> Detect left, right, up and down gestures using APDS9960 sensor, transfer gesture to Firebase and display in mobile app	APDS9960 Color & Gesture sensor	
7	<b>Heart Rate Monitoring using IoT</b> Detect heartbeat (beats per minute) using MAX30102 sensor, transfer heartbeat data to Firebase and display in mobile app	MAX30102 Heartbeat & SPO2 monitor	
8	<b>Wake Sound Detection and Alarm Notification</b> Record sound using a MEMS microphone, transform to frequency domain using FFT, detect presence of the specific frequency of a bell and transfer status to Firebase	INMP441 MEMS mic	
9	<b>IoT based Real Time Appliance Control</b> Based on start, stop timings set in mobile app and transferred to Firebase control an appliance using Gismo6	Relay RTC using Internet	Onboard Relay

10	<b>Environment Monitoring using IoT</b> Measure temperature, atmospheric pressure and altitude using BMP280 sensor, transfer data to Firebase and display values in mobile app	<b>Bosch's BMP280 Environment Moniro</b>
